Our 5th generation APU includes a single serpentine belt system that is maintenance free with over 3 times the life of the traditional belt setup!

# GREEN APU

AUXILIARY POWER UNIT

"I've been driving trucks for nearly a decade now and I can say from extensive experience that this APU is the best thing. My cab is the most comfortable it's ever been and I can always count on my truck to start up, no matter how harsh the weather is outside."  
- Steven Rogers

AUTHORIZED SERVICE BY

"In my business, consistency is everything. That's why I rely on Green APU for my entire fleet of trucks. Their systems keep everything running smoothly and they save me a ton of money on diesel. Since we started using them, my drivers are happier and my profits are better than ever."  
- Maria Romero
